

# ORAL SURGERY

This course is designed to demystify oral surgery and develop your surgical abilities in areas such as bone and soft tissue surgery. It will equip you with the skills and knowledge to perform surgical procedures competently.

Throughout this highly engaging and demanding course, you will receive education in the surgical and non-surgical treatment of medically-compromised patients, with a particular emphasis on contemporary practice, evidence-based principles and systems to ensure an optimal outcome for the patient and practitioner.

- Research Dissertation

## WHY CHOOSE THIS PROGRAMME?

This course is perfect for dental professionals looking to develop their surgical skills and undergo advanced surgical procedures. You will have the opportunity to research a specific area of oral surgery in depth as well as learning alongside experts at a teaching hospital. During this experience, you will be able to meet like-minded colleagues and expand your international professional network.

The course is delivered in different formats and different length duration so that you can choose the options that best fits your career and personal commitments.

## (AIMS & OBJECTIVES)

The course has been specifically designed to demystify oral surgery. It aims to develop your knowledge and competencies in the diagnosis and management of oral and facial pathologies, simple and advanced surgical exodontia, soft tissue surgery, excision of lesions, oral implantology, bone grafting and equip you with the skills and knowledge to perform surgical procedures competently.

You will develop your judgement skills based on evidence and management of patient cases using a multidisciplinary approach from discussion with colleagues from other programmes.

If you choose the distance learning option and are unable to attend the residential workshops, we will send you the materials you would need to complete the hands-on in your own time.

## WHO IS IT FOR?

Dentists wanting to develop their surgical abilities.

## LEARNING OPTIONS

### **Masters of Science (MSc) in Clinical Oral Surgery**

Distance Learning

**Length of course:** 3 years  
180 UK credits

This course is delivered entirely online; you will be able to attend synchronous and recorded seminars on our advanced virtual learning platform. The practical sessions are also recorded, and the relevant materials are posted for you to complete the procedures in your practice.

---

### **Masters of Science (MSc) in Clinical Oral Surgery**

Blended Learning (Part Time)

**Length of course:** 3 years  
180 UK credits

There are two options for completing your clinical training. The first option involves two intensive week-long residential schools in each stage of the course at our College in Central Birmingham. These sessions will only cover clinical aspects of the course, ensuring that you are confident in your hands-on abilities.

The second option is for students who are able to travel to College more often and consists of three full days a month (spread over nine months) and involves a mix of practical and clinical sessions.

---

### **Master of Science (MSc) in Oral Surgery**

Full Time

**Length of course:** 3 years  
540 UK credits

You will study on a full time basis in our state-of-the-art College and Hospital in central Birmingham. The course is delivered over

40 weeks per year, and you will be exposed to diverse techniques and approaches. You will learn from a multidisciplinary team and gain professional experience by performing advanced surgical procedures on simulated models and cadaveric specimens.

**Flexibility to exit with a Post-Graduate Certificate (PG-Cert) or Post-Graduate Diploma (PG-Dip) in Clinical Oral Surgery.**

## ENTRY REQUIREMENTS:

### **Distance Learning and Blended Learning Applicants**

- Undergraduate Degree in Dentistry, and
- Current GDC registration (for UK applicants only) or equivalent for international students, and
- Applicants will need to demonstrate evidence of professional indemnity cover, and
- Health clearance to be able to perform clinical practice, and
- Current evidence of satisfactory DBS check

### **Full Time Applicants**

- Undergraduate Degree in Dentistry, and
- Letter of good standing or equivalent from an appropriate regulatory dental body, and
- Applicants will need to demonstrate evidence of professional indemnity cover

### **English Language Requirements**

Our courses require a minimum English level of IELTS 6.0 or equivalent, with no band score under 5.5. If you do not meet the English language requirement we will give you a conditional offer subject to you meeting the requirement before the commencement of the course
